March 2012

HESI Annual Meeting in Prague – Registration Open Now!
We look forward to seeing all of you in Prague 12-14 June 2012 for our debut Annual Meeting in Europe. Registration and meeting materials are available here.

HESI Science Featured at SOT 2012: Something to see every day...
• Monday March 12, 2012: There’s still time to register for HESI’s Annual Lunchtime Seminar. This year’s featured speaker is Martyn T. Smith, PhD, University of California, Berkeley, who will discuss “Finding Causes of Hematological Cancers.” Contact James Kim, jkim@hesiglobal.org, for registration info.
• Tuesday, March 13, 2012: Workshop: Nonclinical and Clinical Applications of Translational Organ-based Imaging, 1:30-4:15 PM, Room 104.
• Wednesday, March 14, 2012: Presentation: Global collaborations to advance combined exposure assessment; Highlights of ILSI-HESI projects.” Presenter: Prof. Alan Boobis (Imperial College London). Informational Session: Evolution and Implementation of Combined Chemical Exposures Methods - International Perspectives, 4:30-5:50 PM, Room 303.
• Thursday, March 15, 2012: Symposium: Advances in Bridging Nonclinical Cardiovascular Data to the Clinic, 9:00-11:45 AM, Room 302.

HESI Protein Allergenicity Symposium in Prague
Space is still available at the HESI Protein Allergenicity Technical Committee upcoming Symposium on Sensitizing Properties of Proteins (11-13 April 2012) in Prague, Czech Republic. The allergenic potential of new proteins in the human food chain has been assessed by eliciting reactions in allergic patients who have been identified as potentially cross-reactive. Significantly less attention has been given to assessing whether a new protein may become a food allergen independent of previous sensitizations. The purpose of the Symposium is to summarize current knowledge about the sensitizing properties of proteins and to explore the applicability of emerging experimental techniques in regulatory settings. Registration is available here.

HESI Emerging Issues Committee Reviews New Projects
Each year HESI holds an open solicitation for new project ideas to ensure that we continue to adopt relevant and impactful science. The Emerging Issues Committee’s Science Advisors met on February 23, 2012, to review this year’s submissions. Two new project proposals will be shared at the June 2012 Annual Meeting for consideration by the HESI membership: 1) neurotoxicity biomarkers, and 2) use of the dried blood spot method in nonclinical testing. Details on the proposals will be distributed in advance of the Annual Meeting.

Welcome to New HESI Sponsor Companies
Special thanks and welcome to the following organizations that have joined HESI for the first time in 2012: Vertex Pharmaceuticals, BioReliance, Integrated Laboratory Systems, Exiqon, and VisualSonics. We look forward to partnering with you.

Staffing News
HESI welcomes a new staff member! Jennifer Pierson, MPH, joined HESI on February 27 as a Scientific Program Associate. She will be working with the Cardiac Safety, Epidemiology, and PSSC programs. Please join us in welcoming her!

From the Executive Director: You have all received the invitation to the Annual Meeting; however, let me emphasize the importance of your attendance. Participation in the HESI Annual Meeting provides a critical opportunity to engage with your organizational peers, influence the goals of HESI for future years, and share in updates on the scientific portfolio. This is your organization so please join me and your colleagues in helping to shape its success and impact. I look forward to seeing you in Prague.
