BIANNUAL MEETING

**A Roadmap for AI-Enabled
Human and Environmental
Health Protection**

JUNE 4-5, 2025

▶ **Explore how AI can transform health prediction and protection** by enabling a more integrated and efficient approach across biological and ecological levels.

▶ **Build partnerships across diverse sectors** and disciplines with other scientists, policymakers, industry experts, and stakeholders to advance innovative, data-driven AI approaches.

▶ **Contribute to the alignment of AI innovations** with real-world decision-making for health and environmental outcome.

▶ **Join expert-led discussions, case studies, and interactive panels** addressing AI's role in predictive toxicology, ecosystem modeling, and beyond.

National Academy of Sciences Kavli Auditorium, Washington DC
